Healthy Lives

**Impacts**

- Improved health outcomes
- Lower costs
- Better care
- Equity

2025 IMPACT TARGETS

- 90% of adults report a routine checkup in past year (2016: 81.5%)
- 75% of children have a medical home (2016: 52.1%)
- 80% of health care dollars paid through alternative payment models
- 50% reduction in disparity in health status

**Short & Long-Term Outcomes**

Better management of health conditions

Decreased risk of developing diseases

Reduced disparities in health status, outcomes & quality of care

Better coordination between settings

Better governance & accountability

Outcomes will be monitored at the investment, cluster, and strategy levels. The Rhode Island Foundation has identified priority indicators and metrics for tracking short- and long-term change.

**Strategies & Activities**

**Increase primary care access, utilization & quality**

- Improve primary care recruitment & retention
  - Diversify workforce pipeline
  - Support provider well-being
  - Prioritize shortage areas

- Improve patient-centered primary care
  - Reduce barriers
  - Focus on high-need populations
  - Promote new models & delivery settings

**Expand alternative care models & collaborations to address social determinants**

- Increase cross-sector partnerships
  - Expand linkages between primary health care and social services
  - Promote place-based collaboration

- Increase adoption of care models that improve coordination & integration

**Promote system reform to support better health, better care, & lower costs**

- Pursue strategic reforms to state system
  - Increase availability & use of cost/price data
  - Improve resource allocation
  - Better policies

**2020 ACTIVITY TARGETS**

- 5,000 patients will be directly served by grantees*
- 60 health professionals supported with an emphasis on those employed in health professional shortage areas*
- 100% of established cross-sector partnerships demonstrate progress toward short and longer-term outcomes for partnering organizations and beneficiaries
- 60% of grants awarded will support early implementation of priorities identified by the Long-term Health Planning Committee

* Equity target of 65% to ensure individuals and communities have the resources they need to succeed.
