Healthy Lives

Strategies & Activities

Increase primary care access, utilization & quality
- Improve primary care recruitment & retention
  - Diversify workforce pipeline
  - Support provider well-being
  - Prioritize shortage areas
- Improve patient-centered primary care
  - Reduce barriers
  - Focus on high-need populations
  - Promote new models & delivery settings

Expand alternative care models & collaborations to address social determinants
- Increase cross-sector partnerships
  - Expand linkages between primary health care and social services
  - Promote place-based collaboration
  - Increase adoption of care models that improve coordination & integration

Promote system reform to support better health, better care, & lower costs
- Pursue strategic reforms to state system
  - Increase availability & use of cost/price data
  - Improve resource allocation
  - Better policies

2020 ACTIVITY TARGETS

5,000 patients will be directly served by grantees*
60 health professionals supported with an emphasis on those employed in health professional shortage areas*
100% of established cross-sector partnerships demonstrate progress toward short and longer-term outcomes for partnering organizations and beneficiaries
60% of grants awarded will support early implementation of priorities identified by the Long-term Health Planning Committee

*We have an equity target of 65% to reduce disparities in healthcare access and health outcomes. We use the following measures to inform our progress toward this equity target: patient demographics including race and socioeconomic status, health outcomes by population and geography, and providers working in health professional shortage areas.

Short & Long-Term Outcomes

Outcomes will be monitored at the investment, cluster, and strategy levels. The Rhode Island Foundation has identified priority indicators and metrics for tracking short- and long-term change.

Impacts

2025 IMPACT TARGETS

90% of adults report a routine check-up in past year (2016: 81.5%)
75% of children have a medical home (2016: 52.1%)
80% of health care dollars paid through alternative payment models
50% reduction in disparities in health status
