Vision

Rhode Island’s world-class public education system prepares all students to succeed in life and contribute productively to the community.

To do our best work as a state – and to truly improve outcomes for all Rhode Islanders – we need to chart a course, and stay the course – committed to high achievement and equity for students, families, and educators.

We must pursue a comprehensive public education system, developed by the Long-Term Education Planning Committee, and advanced in 2018-2019 by the Rhode Island Foundation. This group – charged with a monumental ambition, but also armed with the best available education research and guidance – came together to build an aspirational 10-year plan for pre-K to Grade 12 education.

The vision, priorities, and strategies presented here were developed by the Long-Term Education Planning Committee, convened to do our best work as a state – and to truly improve outcomes for all Rhode Islanders.

Today, we bring you the fruits of our labor.
